

ANGLO AMERICAN FUNDING FACTSHEET

This factsheet provides a high level overview of the main financing arrangements of the Group as at 30 June 2026.

1. Net debt management

The Group policy is to hold the majority of its cash and borrowings at the corporate centre. Businesses may from time to time raise borrowings in connection with specific capital projects, and subsidiaries with non-controlling interests have borrowings which are without recourse to the Group. Restrictions on cash and cash equivalents primarily relate to cash which is held in joint operations where the timing of dividends is jointly controlled by the joint operators. Restricted cash as at 30 June 2026 amounted to \$179m.

For more detail on Financial Risk Management please see the Integrated Annual Report.

2. Access to cash

The majority of Group cash is held at the London or South African corporate centres. It is Group policy for excess cash balances to be repatriated to the corporate centres by way of dividends or deposits. The remaining cash balances are held by the businesses for local working capital purposes.

Cash held at the London corporate centre and certain businesses is primarily invested in highly rated, instant access USD-denominated money market and treasury funds. Cash held in South Africa is first applied inter-group and any residual cash is invested in rated money market funds, bank deposits as well as government bonds through repo transactions.

As the Group operates in South Africa, all subsidiaries of the Group registered in South Africa are subject to prevailing South African Exchange Control Regulations. These regulations are not expected to have a material effect on the ability of the Group to meet its ongoing obligations.

As at 30 June 2026, the Group maintained a liquidity position of \$15.5bn comprised of \$8.9bn of cash and \$6.6bn of undrawn committed bank facilities.
