

Our 2021 Interim Results

Strong market demand and operational resilience deliver underlying EBITDA of \$12.1 billion

"The first six months of 2021 have seen strong demand and prices for many of our products as economies begin to recoup lost ground, spurred by stimulus measures across the major economies. Against a backdrop of ongoing Covid hardships in many countries, our commitment to do everything we can to help protect our people and communities stands firm. Our business is increasingly geared towards providing the future-enabling metals and minerals for a low carbon economy and to meet global consumer demand trends. Combined with our commitment to carbon neutrality across our operations by 2040, we are working to meet the expectations of our full breadth of stakeholders."

Mark Cutifani, Chief Executive

RESULTS HIGHLIGHTS

Underlying EBITDA*

\$12.1bn

+262% YoY

Net Debt

\$2.0bn

0.1x underlying EBITDA

Attributable free cash flow*

\$5.4bn
